# Installation

## Files available for download

Your custom theme includes the following files:

InvisibleDog.DNN7.zip

*This is the installation file*

InvisibleDog.DNN7.SetupGuide.pdf

*Current documentation file*

InvisibleDog.DNN7.DemoContent.zip

*This is demo content file*

## Installing the theme

We strongly recommend the use of stable DNN versions.

Your installation file is **InvisibleDog.DNN7.zip**

1. Login to your DNN site using a host account
2. Go to Host » Extensions
3. From the menu inside the page select "Install Extension Wizard"
4. "Browse" your computer to select the appropriate theme to install (InvisibleDog.DNN7.zip)
5. Click "Next", and follow all steps until installation is completed
6. Check if installation was successful. You're done!

*Note: Make sure you have at least version 2.0 of DDRMenu installed.*

## Applying the theme

1. To apply the theme to your entire website, go to page Admin » Site Settings
2. On the "appearance" section you can define the default portal theme and container, as well as the admin theme and container
3. Theme can also be applied to a specific page or container.

## Trial themes

For more information on downloading trial themes, please read our knowledge base article:

<http://support.bind.pt/entries/22356848-how-can-i-request-a-trial-theme>

## CSS Compression

This theme is delivered with **compressed CSS files**, for **performance improvement reasons** (making websites load a lot faster).

Next to each **skin.css** file you will find a **skin.uncompressed.css** file. In case you need to edit your CSS, or if you just don't want it compressed, you can rename it and use it, instead of the compressed version.

This theme includes several other CSS files (for containers mainly). Uncompressed versions will be sent upon request.

## Troubleshooting

Our themes are extensively tested. Nevertheless, as with any software product, occasional issues may occur. Here we list the solution for some common ones.
