HTTP Error 404.0 - Not Found

The resource you are looking for has been removed, had its name changed, or is temporarily unavailable.

Most likely causes:

- The directory or file specified does not exist on the Web server.
- The URL contains a typographical error.
- A custom filter or module, such as URLScan, restricts access to the file.

Things you can try:

- Create the content on the Web server.
- Review the browser URL.
- Create a tracing rule to track failed requests for this HTTP status code and see which module is calling SetStatus. For more information about creating a tracing rule for failed requests, click [here](#).

Detailed Error Information:

Module	IIS Web Core	Requested URL	http://skinfactory.v2.localhost.bind.pt:80/Assets/Packs-Pre/Metro/UMB/UMB4_5/bp/BindPrintFile.html
Notification	MapRequestHandler	Physical Path	C:\inetpub\wwwroot\Assets\Packs-Pre\Metro\UMB\UMB4_5\bp\BindPrintFile.html
Handler	StaticFile	Logon Method	Anonymous
Error Code	0x80070002	Logon User	Anonymous

More Information:

This error means that the file or directory does not exist on the server. Create the file or directory and try the request again.

Theme name Metro (based on Metro)

Platform Umbraco 4.5 +

Date generated 2017-24-3 14h55m

Customer email mail@bind.pt

Master Templates

Master Templates will be added to your *Templates* folder in *Settings* section.

The number of included master templates depends on each theme. As an example, some skins include a "Home" master (for the homepage) and an "Inner" master (for the remaining pages).

Apply the Master Page Templates

- a. Open/Switch to the *Settings* section;
- b. Expand the *Templates* tree folder to locate the Metro Master Templates.
- c. Choose your *Template* (to associate with the desired Metro master template).
- d. Change the *Master template*.
- e. Click Save

IMPORTANT NOTE: When changing the Master Pages you will need to rename all the ContentPlaceHolderIDs on that document type template for the new ContentPlaceHolderIDs of the skin.

Using Containers

This skin includes several containers, that you can use to visually “wrap” your content.

Containers files are located inside the "Containers" folder within the Metro.UMB4_5.zip. You just need to extract the folder and open/edit the html files.

We recommend that a container be always used to wrap content. If you don't need any style around your content, use container C00_Clean or C00_CleanWPadding.

To use a container:

1. Copy the structure inside the html files

- a. Example:

```
<div class="C01 container">
  <div class="TL">
    <div class="TR">
      <div class="TM"><span class="CTitle"/>/*Insert Container Title*/</span></div>
    </div>
  </div>
  <div class="ML">
    <div class="MR">
      <div class="MM">/*Container Content*/</div>
    </div>
  </div>
<div class="BL"><div class="BR"><div class="BM"></div></div></div></div>
```

2. Open your document type template and for your content placeholders content insert the containers structure.

- a. Example:

```
<asp:Content ContentPlaceHolderID="L7_Zone40_2" runat="server">
<div class="C01 container">
  <div class="TL">
    <div class="TR">
      <div class="TM"><span class="CTitle"/>Latest News</span></div>
    </div>
  </div>
  <div class="ML">
    <div class="MR">
      <div class="MM">
<h2>Lorem ipsum dolor sit amet, sectetuer</h2>
        <p>Quisque volutpat mattis eros. Nullam malesuada erat ut turpis. Suspendisse urna nibh, viverra non, semper suscipit, posuere a, pede...</p>
        <a onclick="return false" class="btn" href="#">Read more</a>
        <p>Quisque volutpat mattis eros. Nullam malesuada erat ut turpis. Suspendisse urna nibh, viverra non, semper suscipit, posuere a, pede...</p>
        <a onclick="return false" class="btn" href="#">Read more</a>
      </div>
    </div>
  </div>
  <div class="BL"><div class="BR"><div class="BM"></div></div></div>
</div>
</asp:Content>
```

Uninstalling the theme

To uninstall the theme we recommend the following procedure:

1. Open Umbraco CMS Back Office;
2. Go to *Developer* section;
3. Open *Packages* tree folder and open "Installes packages" option;
4. Select the package Metro;
5. In *Package options* click at "Uninstall package";
 - a. Before you uninstall the package remember to set your pages template to another template not from this theme.

Sometimes unistalling the theme don't remove all the resources, so we need to do it manually

We need to have access to the server where Umbraco site is installed and check the following directories and remove the remaining files:

- [Your Umbraco root]/**css**/Metro folder and the respective css file
- [Your Umbraco root]/**masterpages**/[all master from the theme]
- [Your Umbraco root]/**scripts**/Metro folder
- [Your Umbraco root]/**xslt**/BindBreadcrumb.xslt and BindNavigation.xslt

Further adjustments

Example Content

This skin includes some sample content, in areas like: Logo, Language Selection, Sign In/Out, Current User and Links (Read our terms, Read about privacy, Sitemap).

Further functionalities can be added as necessary. Remember to use skin pre-defined css styles.

Navigation Menus

This skin makes use of an xslt file to create horizontal and vertical navigation.

You can hide pages from navigation by creating a document property field with alias "umbracoNaviHide" and type "True/False".

You also can deactivate a page so it can't be clicked by creating a document property with alias "umbracoNavilnactive" and type "True/False". This will also be reflected in the Breadcrumb.

Vertical Menu

In some themes, after applying the skin, vertical menu may disappear. This might happen when the page doesn't have any content. Menu should appear after adding some content.

Trial themes

For more information on downloading trial themes, please read our knowledge base article:

<http://support.bind.pt/entries/22356848-how-can-i-request-a-trial-theme>

CSS Compression

This theme is delivered with **compressed CSS files**, for **performance improvement reasons** (making websites load a lot faster).

Next to each **Metro.css** file you will find a **Metro.uncompressed.css** file. In case you need to edit your CSS, or if you just don't want it compressed, you can rename it and use it, instead of the compressed version.

This theme includes several other CSS files (for containers mainly). Uncompressed versions will be sent upon request.

Troubleshooting

Our themes are extensively tested. Nevertheless, as with any software product, occasional issues may occur. Here we list the solution for some common ones.

[How to use Megamenu / Accordion navigation with BindMENU \(from Bind Tuning v2.0.0\)](#)

[Content overflows my page's width](#)

[Web fonts are not being rendered](#)

[I still didn't receive my custom theme, what should I do?](#)

[How do I get an update for my theme?](#)

[How do I add Demo Content to Umbraco theme?](#)

Customer support

BindTuning is proud to deliver excellent support service to its customers. You can access support in multiple ways, described below.

Standard support

BindTuning Knowledge Base

Our knowledge base is an excellent resource when you need support. Access our team's articles with solutions to common questions or to issues previously encountered by others. Suggest further enhancements to our products by posting your ideas, or vote on other users ideas.

Please note that our knowledge base is a resource for search and community sharing. Other options are available for urgent support.

To access the forum please visit <http://support.bind.pt/forums>

BindTuning Helpdesk

You can also choose to post your questions and suggestions directly to our support team, through our helpdesk system.

Your question will be reviewed and forwarded to the proper department.

Always remember to mention your invoiceID when submitting a new support ticket. You should receive an answer in less than 24 hours.

To access the forum please visit <http://support.bind.pt/tickets/new>

Premium Support

- Theme installation / upgrade
- Manual theme adjustments and customization
- Further changes to themes
- Premium support is required beyond 60 days after purchase

For further information on Premium Support please visit www.bindtuning.com or email us at support@bindtuning.com.
