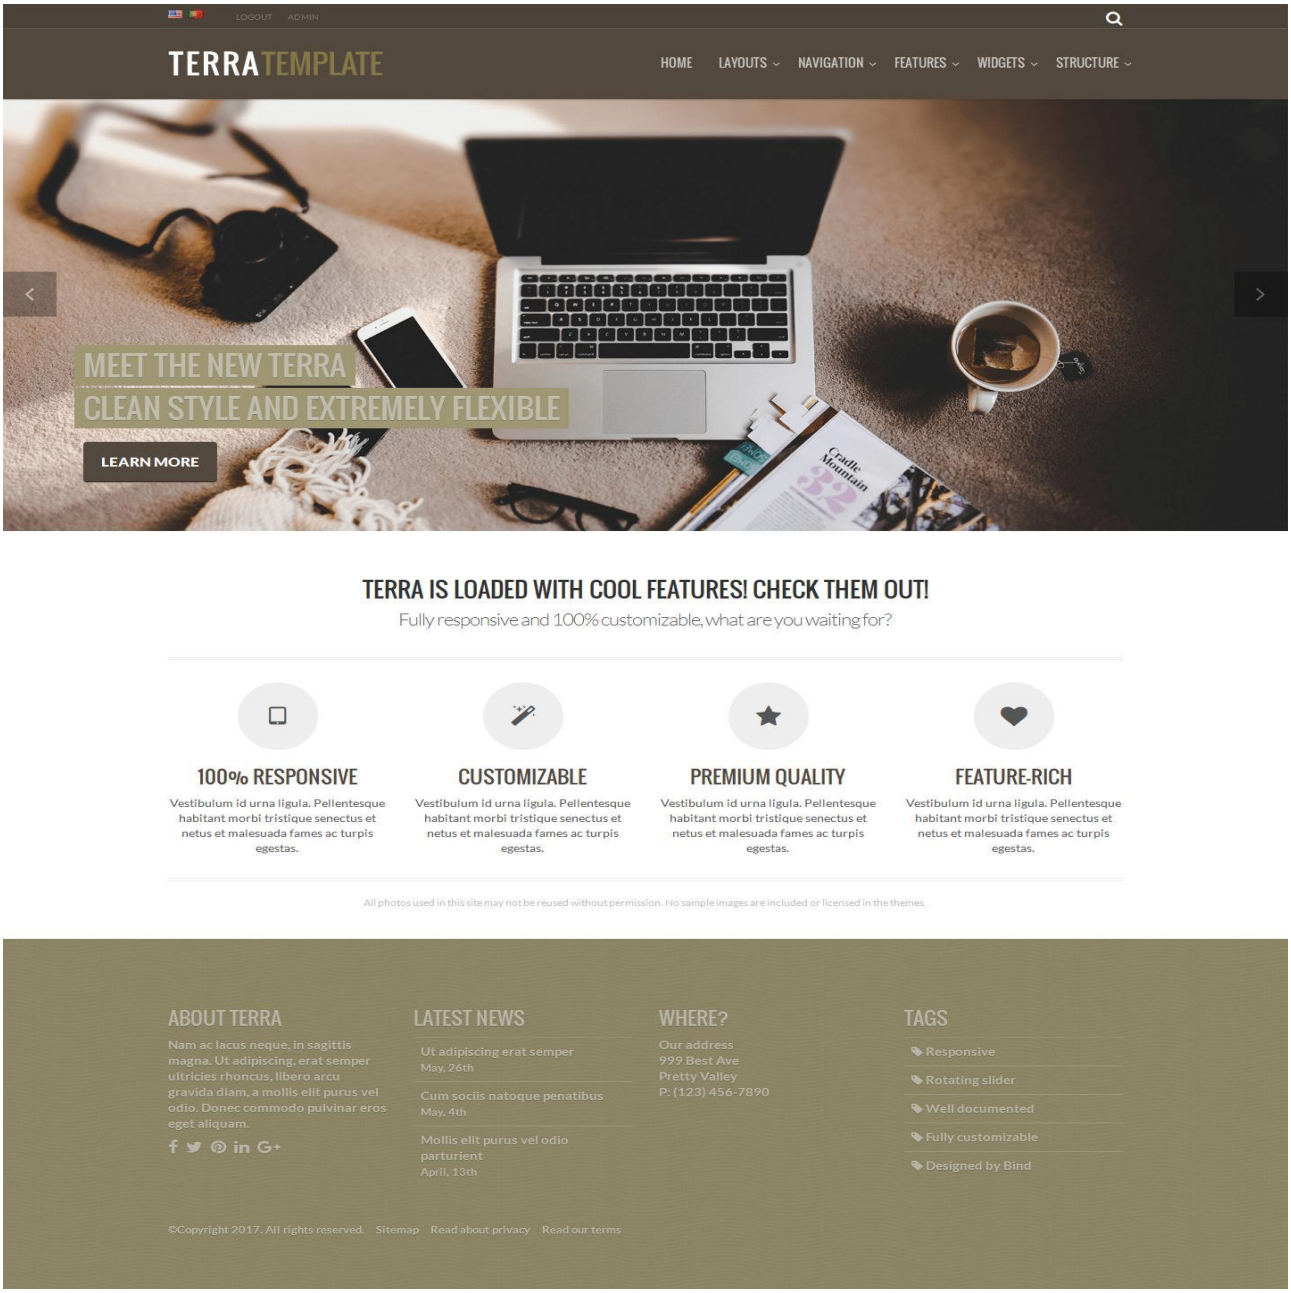
Theme Details



Theme name	Terra *(based on Terra)*
Platform	Umbraco 7
Date generated	2017-26-11 17h15m
Customer email	mail@bind.pt

Installation

Files available for download

Your custom skin includes the following files:

Terra.UMB7.zip	*This is the installation file*
Terra.UMB7.SetupGuide.pdf	*Current documentation file*
Terra.UMB7.DemoContent.zip	*This is demo content file*

Setup files

Inside Terra.UMB7.zip you have:

- \Containers folder Includes html for containers, explained further on;
- \TerraSkinFiles folders Includes other skin files

IMPORTANT NOTE: Our themes don't provide demo content as the starter kits available in Umbraco. If you need you can install from "Umbraco package Repository" the "Txt Starter Kit" this will create a demo site where you can apply our themes.

Installing the package

For installing the Terra skin you will need to follow the next steps.

1. Open Umbraco CMS Back Office;
2. Go to *Developer* section;
3. Open *Packages* tree folder and click "Install local package" option;
4. Search for the package Terra.UMB7.zip;
5. Accept "*I understand the security risks associated with installing a local package*";
6. Click "*Load Package*";
7. Check "Accept license" and click "Install Package".

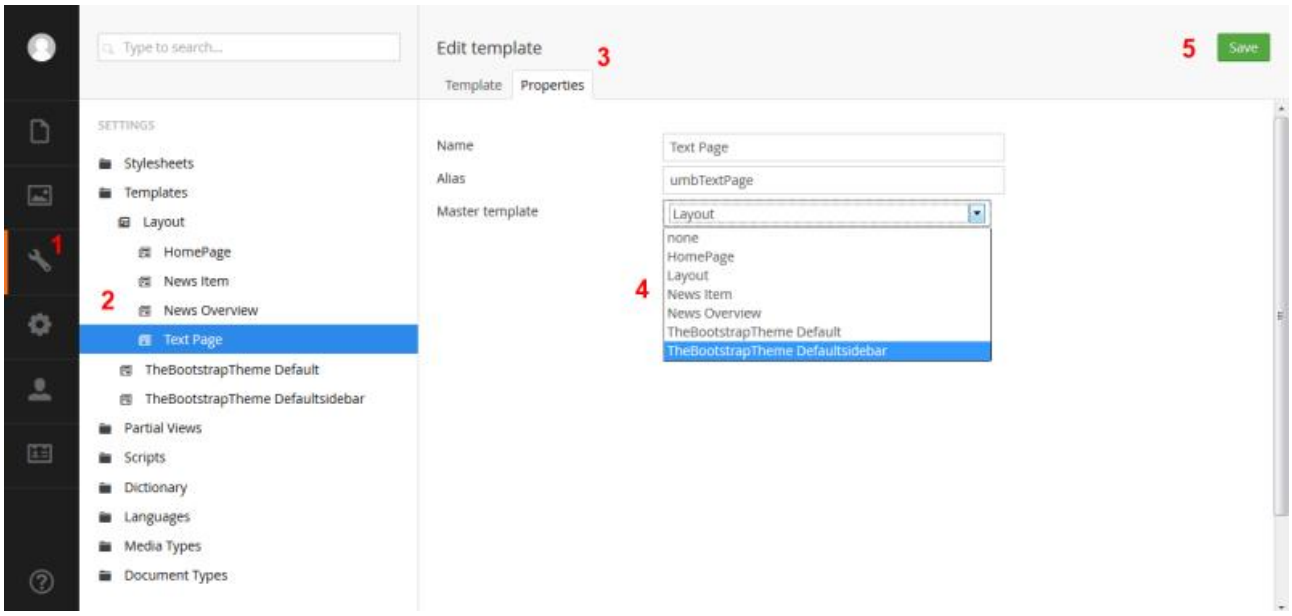
IMPORTANT NOTES:
If you are using a trial skin, you may get a warning/conflicts about a dll file; proceed with the installation.
If you already have any of our skins installed, you may get some file conflicts you can ignore and install it
If you have duplicate files in the Templates sections you have to reset your site.

Master Templates

Master Templates will be added to your *Templates* folder in *Settings* section.

The number of included master templates depends on each theme. As an example, some skins include a "Home" master (for the homepage) and an "Inner" master (for the remaining pages).

Apply the Master Page Templates



1. Open/Switch to the *Settings* section;
2. Expand the *Templates* tree folder to locate the Terra Master Templates and select the page layout to apply the master.
3. Change to the Properties tab.
4. Choose your *Template* (to associate with the desired Terra master template).
5. Click Save

Using Containers

This skin includes several containers, that you can use to visually “wrap” your content.

Containers files are located inside the "Containers" folder within the Terra.UMB7.zip. You just need to extract the folder and open/edit the html files.

We recommend that a container be always used to wrap content. If you don’t need any style around your content, use container C00_Clean or C00_CleanWPadding.

To use a container:

1. Copy the structure inside the html files
    a. Example:

```
<div class="C01 container">
   <div class="TL">
      <div class="TR">
         <div class="TM"><span class="CTitle"/>/*Insert Container Title*/</span></div>
      </div>
   </div>
   <div class="ML">
      <div class="MR">
         <div class="MM">/*Container Content*/</div>
            </div>
      </div>
   <div class="BL"><div class="BR"><div class="BM"></div></div></div></div>
```

2. Open your document type template and for your section content insert the containers structure.
    a. Example:

```
@section L7_Zone40_2 {
        <div class="C01 container">
           <div class="TL">
              <div class="TR">
                 <div class="TM"><span class="CTitle"/>Latest News</span></div>
              </div>
           </div>
           <div class="ML">
              <div class="MR">
                 <div class="MM">
        <h2>Lorem ipsum dolor sit amet, sectetuer</h2>
                <p>Quisque volutpat mattis eros. Nullam malesuada erat ut turpis.
        Suspendisse urna nibh, viverra non, semper suscipit, posuere a, pede...</p>
                <a onclick="return false" class="btn" href="#">Read more</a>
                <p>Quisque volutpat mattis eros. Nullam malesuada erat ut turpis.
        Suspendisse urna nibh, viverra non, semper suscipit, posuere a, pede...</p>
        <a onclick="return false" class="btn" href="#">Read more</a>
          </div>
                    </div>
              </div>
           <div class="BL"><div class="BR"><div class="BM"></div></div></div>
        </div>
}
```

Uninstalling the theme

To uninstall the theme we recommend the following procedure:

1. Open Umbraco CMS Back Office;
2. Go to *Developer* section;
3. Open *Packages* tree folder and open “Installes packages” option;
4. Select the package Terra;
5. In *Package options* click at “Uninstall package”;
    a. Before you uninstall the package remember to set your pages template to another template not from this theme.

Sometimes unistalling the theme don’t remove all the resources, so we need to do it manually

We need to have access to the server where Umbraco site is installed and check the following directories and remove the remaining files:

- [Your Umbraco root]/**css**/Terra folder and the respective css file
- [Your Umbraco root]/**views**/[all master from the theme]
- [Your Umbraco root]/**scripts**/Terra folder
- [Your Umbraco root]/**views**/**Partials**/BindBreadcrumb.cshtml and Terra Navigation.cshtml

Further adjustments

Example Content

This skin includes some sample content, in areas like: Logo, Language Selection, Sign In/Out, Current User and Links (Read our terms, Read about privacy, Sitemap).

Further functionalities can be added as necessary. Remember to use skin pre-defined css styles.

Vertical Menu

In some themes, after applying the skin, vertical menu may disappear. This might happen when the page doesn't have any content. Menu should appear after adding some content.

Trial themes

For more information on downloading trial themes, please read our knowledge base article:

http://support.bind.pt/entries/22356848-how-can-i-request-a-trial-theme

CSS Compression

This theme is delivered with **compressed CSS files**, for **performance improvement reasons** (making websites load a lot faster).

Next to each **Terra.css** file you will find a **Terra.uncompressed.css** file. In case you need to edit your CSS, or if you just don't want it compressed, you can rename it and use it, instead of the compressed version.

This theme includes several other CSS files (for containers mainly). Uncompressed versions will be sent upon request.

Troubleshooting

Our themes are extensively tested. Nevertheless, as with any software product, occasional issues may occur. Here we list the solution for some common ones.

How to use Megamenu / Accordion navigation with BindMENU (from Bind Tuning v2.0.0)

Content overflows my page's width

Web fonts are not being rendered

I still didn't receive my custom theme, what should I do?

How do I get an update for my theme?

How do I add Demo Content to Umbraco theme?

For other troubleshooting topics visit our Knowledge Base at http://support.bind.pt

Customer support

BindTuning is proud to deliver excellent support service to its customers. You can access support in multiple ways, described below.

Standard support

BindTuning Knowledge Base

Our knowledge base is an excellent resource when you need support. Access our team's articles with solutions to common questions or to issues previously encountered by others. Suggest further enhancements to our products by posting your ideas, or vote on other users ideas.

Please note that our knowledge base is a resource for search and community sharing. Other options are available for urgent support.

To access the forum please visit http://support.bind.pt/forums

BindTuning Helpdesk

You can also choose to post your questions and suggestions directly to our support team, through our helpdesk system.

Your question will be reviewed and forwarded to the proper department.

Always remember to mention your invoiceID when submitting a new support ticket. You should receive an answer in less than 24 hours.

To access the forum please visit http://support.bind.pt/tickets/new

Premium Support

- Theme installation / upgrade
- Manual theme adjustments and customization
- Further changes to themes
- Premium support is required beyond 60 days after purchase

For further information on Premium Support please visit www.bindtuning.com or email us at support@bindtuning.com.
