Installation

Files available for download

Your custom theme includes the following files:

TheBootstrapTheme.Drupal7.zip

This is the installation file

TheBootstrapTheme.Drupal7.SetupGuide.pdf
file

Current documentation

TheBootstrapTheme.Drupal7.DemoContent.zip

This is demo content file

Installing and applying the theme

Your installation file is **TheBootstrapTheme.Drupal7.zip**

For install the theme TheBootstrapTheme you need to follow one of two simple ways to install themes in Drupal:

1. Install theme in Browser (Drupal Installation):

From the top menu bar, select **Appearance** and then click on the Install New Theme link found at the top of the page.

[+ Install new theme](#)

On the install page you can either enter the entire URL where the theme zip file is located or, if you downloaded the file archive, use the *Browse* button to find and upload the file from your computer. The field should reflect the path to the folder you downloaded the zip file. Click the Install button to upload and install the theme.

Install from a URL

For example: <http://ftp.drupal.org/files/projects/name.tar.gz>

Or

Upload a module or theme archive to install

For example: [name.tar.gz](#) from your local computer

Once completed, you should get a success message. Click *Enable Newly Added Themes* to continue to the themes page for the next step.

Installation was completed successfully.

ThemeName

- Installed ThemeName successfully

Next steps

- [Enable newly added themes](#)
- [Administration pages](#)

Go to "*Disabled Themes*" and "**Enable and set default**" the theme installed. Enjoy!!!

Note: Only the theme file (*TheBootstrapTheme.Drupal7.zip*) can be installed.

2. Install theme with FTP

Drupal keeps its skins in the **themes** subfolder.

Extract the files under the **themes** subfolder (**sites** -> **all** -> **themes**). This can be done through **cPanel** -> **FileManager**.

If you don't have **cPanel** or you prefer using an **FTPclient**, you can extract the archived theme to your computer and then upload the theme's folder to same directory as explained above.

You should now be able to see the theme at your **Drupal Administration Area** -> **Appearance**. Enable it and set it as default.

Further adjustments

BindTuning provides in our themes, layouts for all types of content types supported by Drupal. Since Articles, Blog, Book, Forum, Poll to a simple Basic Page, everyone has their way of showing content on screen.

We gave some emphasis to the *Blog* and implement options to your presentation was cared for and appealing. Therefore this content type has the following features:

- 6 different layouts;
- possibility of adding author information (image and description, where the description field is available when installing the theme. Go to **People** -> *User* -> (*edit*) add a text *description* for this user);
- possibility of defining *navigation* between post's and what type of *navigation* to be displayed
- ability to *share* the post directly to *social networks*

The native installation of Drupal, by definition comes with 2 *content types*, **Article** and **Basic Page**. For enable other content types you will need to active then.

1. Navigate to **Modules** and scroll to **Core** modules;

2. Check the modules you want activate, like **Articles, Blog, Book, Forum or even a Poll** and *Save Changes*;

Regularly review and install [available updates](#) to maintain a secure and current site. Always run the [update script](#) each time a module is updated.

[+ Install new module](#)

CORE				
ENABLED	NAME	VERSION	DESCRIPTION	OPERATIONS
☐	Aggregator	7.25	Aggregates syndicated content (RSS, RDF, and Atom feeds).	
☒	Block	7.25	Controls the visual building blocks a page is constructed with. Blocks are boxes of content rendered into an area, or region, of a web page. Required by: Dashboard (<i>enabled</i>)	? Help Permissions Configure
☒	Blog	7.25	Enables multi-user blogs.	? Help
☒	Book	7.25	Allows users to create and organize related content in an outline.	? Help Permissions Configure
☒	Color	7.25	Allows administrators to change the color scheme of compatible themes. Required by: Stylizer (<i>disabled</i>)	? Help
☒	Comment	7.25	Allows users to comment on and discuss published content. Requires: Text (<i>enabled</i>), Field (<i>enabled</i>), Field SQL storage (<i>enabled</i>) Required by: Forum (<i>enabled</i>), Tracker (<i>disabled</i>)	? Help Permissions Configure
☐	Contact	7.25	Enables the use of both personal and site-wide contact forms.	
☐	Content	7.25	Allows content to be translated into different languages.	

Theme Settings

BindTuning Theme Settings

BindTuning provides has advanced *BindTuning Settings* panel that is loaded with the theme. There is a set of options that facilitates the optimization and customization of your Drupal website.

Go over in these docs but please take some time and navigate through each tab.

Go to **Appearance > Settings** (off the *BindTuning theme*) and take a look. We've organized them into logical sets and have given descriptions for items that need it.

Be sure to hit *Save Configuration* button, to save your settings once you are done.

Breadcrumb Options:

Drupal has a native way to implement breadcrumb.

BindTuning added to this possibility two options for our themes become even more flexible.

Even after customization carried out in bindtuning.com, you can set whether to show or not the breadcrumb.

The second option concerns the fact that some pages contain titles too large, and for this we can chose the amount of characters are displayed in the breadcrumb.

BindTuning Settings

Layout & Blog	Breadcrumb Yes
Breadcrumb Options	Do you want to show the breadcrumb on page?
Menu	Title length 50
Social Share Networks	The title in the breadcrumb will be truncated after this number of character

Assets	

***Note:** This setting is only visible in the respective layouts.*

Menu:

Our themes contain two regions where the menus are implemented.

These areas are identified in HTML with unique identifiers for the effect (horizontal Menu id=**MenuH** and **MenuV** for Vertical).

For the menus:

- We can define for each region the menu to be shown and even the type of layout that it will have.
- Layouts for horizontal can be of three types and vertical contains one more option, so you have a total of four choices.
 - *Horizontal:*
 - None
 - Default
 - Mega*
 - *Vertical:*
 - None
 - Default
 - Mega*
 - Accordion

*Mega Menu (Options):

The new version of Mega Menu have the ability to format some values to have more control in the construction of this type of menu.

So, for take advantage of this chance, just place desired values in the fields:

- **Max Columns:** Set the maximum columns allowed. Ideal for several menu items;
- **Min Width:** Set the minimum width for sub-menu items (by default, the minimum width is 100px);
- **Max Width:** Set the maximum width for sub-menu items.

Theme development settings:

Drupal 7 theme functions and css styles are built into a theme registry (cache) for improved performance. During theme development you will be making frequent tweaks and updates and would normally need to clear the cache every time you wanted to see the changes take effect.

BindTuning Settings

Layout & Blog	☒ Rebuild theme registry on every page During theme development, it can be very useful to continuously <i>rebuild the theme registry</i> . WARNING: this is a huge performance penalty and must be turned off on production websites. Drupal.org documentation on theme-registry .
Breadcrumb Options	
Menu	
Social Share Networks	
Copyright (footer definitions)	
Theme development settings	
Assets	

This setting, rebuild the theme registry on every page request so that you see your changes instantly. You should not enable this on a production site because rebuilding the theme registry adds a performance impact to each request, but it's a great option while developing your theme so that you can see your changes take effect without having to manually clear the cache each time you make a change.

Assets:

Activation of HTML5Shiv script, which was created to make browsers that do not recognize the new tags, start to recognize the new HTML5 elements. It's only used, when a previous version of Internet Explorer 9 is ben called.

BindTuning Settings

Layout & Blog	☒ HTML5 Shiv The HTML5 Shiv enables use of HTML5 sectioning elements in legacy Internet Explorer and provides basic HTML5 styling for Internet Explorer 6-9, Safari 4.x (and iPhone 3.x), and Firefox 3.x.

Regions

Imagine that your Drupal web site are divided into rectangles, this is *Regions*.

Regions are logical areas defined in your theme and BindTuning themes have a lot of regions so you can put content in the way you want.

Below we present an illuminating picture of the regions, in one of our themes, so you can be aware of amount areas that we include.

On the regions we can put any type of content, Drupal already provides blocks with contents in order to apply. For this we only have to go to *menu* -> **Structure** -> **Blocks** and apply content in regions.

CSS Compression

This theme is delivered with **compressed CSS files**, for **performance improvement reasons** (making websites load a lot faster).

Each theme/skin contains a **style.css** and **style.uncompressed.css** files. In case you need to edit your CSS, or if you just don't want it compressed, you can rename it and use it, instead of the compressed version.

This theme includes several other CSS files (for containers mainly). Uncompressed versions will be sent upon request.

Troubleshooting

Customer support

BindTuning is proud to deliver excellent support service to its customers. You can access support in multiple ways, described below.

Standard support

BindTuning Knowledge Base

Our knowledge base is an excellent resource when you need support. Access our team's articles with solutions to common questions or issues previously encountered by others. Suggest further enhancements to our products by posting your ideas, or vote on other users ideas.

Please note that our knowledge base is a resource for search and community sharing. Other options are available for urgent support.

To access the forum please visit <http://support.bind.pt/forums>

BindTuning Helpdesk

You can also choose to post your questions and suggestions directly to our support team, through our helpdesk system.

Your question will be reviewed and forwarded to the proper department.

Always remember to mention your invoiceID when submitting a new support ticket.

You should receive an answer in less than 24 hours.

To access the forum please visit <http://support.bind.pt/tickets/new>

Premium Support

- Theme installation / upgrade
- Manual theme adjustments and customization
- Further changes to themes
- Premium support is required beyond 60 days after purchase

For further information on Premium Support please visit www.bindtuning.com or email us at support@bindtuning.com
